# Professional and Long-lasting Performance for those Precious Moments

## Catch Every Moment in Bright and Stunning Detail

Capture those special moments in stunning clarity and brightness with the on-board shooting capabilities of the JY-HM70. Brighter and faster than conventional lenses, the dynamic 16x F1.2 Bright Lens gives you professional results in low light environments, providing brilliant results when recording weddings, social functions, or other special events without the need for additional lighting. Low light sensitivity is further enhanced by the onboard features, which deliver clear images with precise colours when indoors or in dark situations. Housed in the prominent lens barrel, the 29.5mm GT Lens was developed specifically to guarantee optimal results together with the 1/2.3-inch 12 Megapixel Back-illuminated CMOS sensor, yielding high resolution, high sensitivity, and excellent colour reproduction.

29.5mm Wide Angle Lens

1/2.3-inch 12M Back-illuminated CMOS Sensor

## Flexible Recording Formats and Powerful Processing

With the kind of flexibility demanded for by professionals, the JY-HM70 covers all of the bases with both SD and HD production workflows. Recording is possible in silky-smooth AVCHD Progressive 1920 x 1080 50p Full HD resolution as well as in standard definition, providing exceptional image quality and workflow versatility.

This remarkable recording flexibility is supported by FALCONBRID™, JVC's high-speed processor for advanced video applications. Delivering tremendous processing power on a single chip, the on-board FALCONBRID™ engine processes large amounts of video pixel data at exceptional speeds. Even more, it is possible to shoot stills in 12 megapixel Ultra High Resolution, while stills and video can be shot simultaneously in 2 megapixel resolution.

## Shoot with Confidence Using Dual SD Card Slots and Automatic Card Slot Relay

For maximum flexibility and convenience, the JY-HM70 uses SDHC/SDXC recording media, the reliability and cost-effectiveness of which makes it the most widely used media by professionals today. Failsafe shooting is further provided by the two onboard card slots, ensuring you never miss a moment. When the card in slot A(B) is full, the camcorder switches seamlessly and automatically to the card loaded into slot B(A)\*. Also, if the card in slot A encounters an error during a shoot, recording will automatically switch to slot B via Auto Recovery Mode.

\* Cards are not hot swappable.

Cards

## Unprecedented Recording Times with Dual Battery Mounts

Equipped with dual battery mounts, the JY-HM70 makes sure that you outlast those extended shoots, giving you long-lasting battery power to capture every moment from start to finish. Two battery mounts not only give you double the recording time initially, they are also hot swappable. This means you can keep exchanging batteries without any break in recording. Marking an industry-first in camcorder battery technology, JVC delivers peace of mind in everlasting power.

\* Only one battery supplied

### Other Features

- Optical Image Stabiliser
- 3.0-inch 230K Touch Panel LCD
- 0.24-inch 260K Viewfinder
- Internal Stereo Microphone
- Face Recognition
- Terminals: HDMI Out, AV Out, Headphone Out, USB, Mic In, Remote

# Specifications

## JY-HM70

| General  |  |
|--|--|
| Power  | DC 11V (AC adaptor), DC 7.2V (Battery)   |
| Power consumption  | Approx. 3.6W (when LCD monitor backlight is set to [Level 3], 1920 x 1080/50i mode)  |
| Dimensions   | 227(W) x 232(H) x 476(D)mm (without battery)   |
| Mass   | Approx. 3.0kg (Including one BN-VF823 battery, SDHC card)  |
| Operating temperature                                    | 0°C to 40°C  |
| Storage temperature                                      | -20°C to 50°C  |
| Operating humidity                                       | 35% to 80%   |
| Storage humidity   | Under 85%  |
| Camera   |  |
| Synchronising system                                     | Internal synchronisation   |
| Stabiliser   | Optical Image Stabilisation with Enhanced Advanced Image Stabiliser  |
| Lens   | JVC HD GT LENS F1.2-2.8, f=3.76-37.6mm<br>35mm conversion: 29.5mm to 476mm*1   |
